

UMBC Laboratory Animal Risk Assessment Form

Please download and complete this brief assessment to determine your potential risks when working in UMBC's animal facilities. Email completed forms to esh@umbc.edu. You will be contacted by Environmental Safety and Health if you need to schedule a time with University of Maryland Family Medicine Associates (FMA) for follow up action. UMBC has an agreement with FMA to provide a more in-depth screening of risk factors, medical evaluations and necessary immunizations to allow you to work in the animal facility. All provided information will be stored with Environmental Safety and Health and will not be shared with anyone with the exception of FMA for scheduling health screenings or health related services.

Risk assessments are integral part of UMBC's Laboratory Animal Facilities Occupational Health & Safety Plan (OHSP) which serves to educate and promote safe practices, personnel safety, as well as prevent occupational injury and illness for the animal care personnel who work with laboratory animals at UMBC. Animal care personnel include individuals who handle live laboratory animals, animal cages, cage accessories or have contact with animal tissues, body fluids or wastes in which a potential exposure may exist. **A tetanus immunization within the past ten (10) years is required for any personnel to work with animals at UMBC.**

The OHSP is written in accordance with the University of Maryland, Baltimore County's Animal Welfare Assurance of Compliance with the Public Health Service Policy on Humane Care and Use of Laboratory Animals (# A3784-01) and is consistent with the principles outlined in the Office of Laboratory Animal Welfare Guide for the Care and Use of Laboratory Animals. If you have any questions, please contact Environmental Safety and Health at 410-455-2918 / esh@umbc.edu or the Office for Research Protections and Compliance at 410-455-2737 / compliance@umbc.edu.
