

UMBC Laboratory Animal Risk Assessment Form

Please download and complete this brief assessment to determine your potential risks when working in UMBC's animal facilities. Email completed forms to esh@umbc.edu. You will be contacted by Environmental Safety and Health if follow up medical services are required. Services include physical evaluations, immunizations, and laboratory testing. Information collected in this form will be stored with Environmental Safety and Health in accordance with all current regulatory and confidentiality requirements.

Risk assessment is an integral part of UMBC's Laboratory Animal Facilities Occupational Health & Safety Plan (OHSP). The OHSP serves to educate and promote safe practices, ensure personnel safety, as well as prevent occupational injury and illness for the animal care personnel who work with laboratory animals at UMBC. Animal care personnel include individuals who handle live laboratory animals, animal cages, cage accessories or have contact with animal tissues, body fluids or wastes in which a potential exposure may exist. **A tetanus immunization within the past ten (10) years is required for any personnel to work with animals at UMBC.** Animal care personnel that are pregnant, planning to become pregnant, are ill, or have impaired immunocompetence should consult a physician regarding such conditions and how they might pertain to their working with laboratory animals.

The OHSP is written in accordance with the University of Maryland, Baltimore County's Animal Welfare Assurance of Compliance with the Public Health Service Policy on Humane Care and Use of Laboratory Animals (# A3784-01) and is consistent with the principles outlined in the Office of Laboratory Animal Welfare Guide for the Care and Use of Laboratory Animals. If you have any questions, please contact Environmental Safety and Health at 410-455-2918 / esh@umbc.edu or the Office of Research Protections and Compliance at 410-455-2737 / compliance@umbc.edu
