

UMBC Occupational Safety Training Guide

This document can be referenced to assist with understanding training requirements for various types of occupational safety training. Also provided in this document is a list of training service providers that have experience with providing training at UMBC or have been otherwise vetted. UMBC utilizes Webnet for many occupational safety-related training topics. If Webnet is listed as a provider, then it is a requirement to use Webnet as the source of training.

Unless otherwise specified, all training costs are the responsibility of the employee's department.

For questions regarding training, contact ESH at 5-2918 or esh@umbc.edu.

Training Subject	Training Frequency	Provider(s)
